CAREER OBJECTIVE

Final-year B.Tech (ECE, 2026) student with strong foundations in Java, DSA, Python, SQL, and web development. Hands-on experience in data analysis through internship and academic projects. Seeking a software development or data-driven engineering role where I can apply my technical skills and grow consistently.

TECHNICAL SKILLS

Programming: Java (OOP, Collections), Python
Data Analysis: Pandas, Matplotlib, Seaborn, Exploratory Data Analysis (EDA)
Web Development: HTML5, CSS3, JavaScript, Responsive Design
Database: MySQL, SQL Queries, Database Management
DSA: Arrays, Strings, Linked Lists, Searching, Sorting
Tools: Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

- Smart Pothole Detection & Mapping System** | *Python, YOLOv8, Flask, HTML/CSS/JS* 2025 – 2026
- Final-year project exploring AI-based pothole detection using YOLOv8 on road footage, integrated with a Flask web interface displaying detection results – developed as a civic tech application for Nagpur Municipal Corporation (NMC).
 - Contributed to connecting the detection pipeline with a web dashboard (HTML/CSS/JS); can explain the overall system flow: video input → model inference → result display.
 - Gained practical exposure to deep learning concepts – object detection, confidence scoring, and bounding box outputs – in a real-world problem setting.
- Customer Churn Analysis** | *Python, Pandas, Matplotlib, Seaborn* Dec 2023
- Performed end-to-end EDA on a **10,000+ record** telecom dataset – cleaned data, handled missing values, and built visualizations to identify key churn patterns.
 - Translated data findings into actionable observations through charts and summary reports; strengthened ability to derive business insights from raw data.
- Library Management System** | *Java, OOP, ArrayList, File Handling* Oct 2023
- Independently designed and built a Java OOP application managing book and member records, borrowing workflows, and automated fine calculation with file-based data persistence.
 - Applied core DSA concepts – searching and sorting – within a functional, real-use-case application.

PROFESSIONAL EXPERIENCE

- Data Analyst Intern** Jan – Mar 2025
Clustor Computing Nagpur
- Cleaned, processed, and analyzed **10,000+** records using Python (Pandas, Matplotlib); built charts and reports that directly supported business decision-making.
 - Automated repetitive data preparation tasks using Python scripts, reducing manual effort and improving reporting consistency.
 - Presented findings through visualizations to non-technical team members, building clear data communication skills.
- Web Development Intern** Mar – May 2024
CodeMate Nagpur
- Built and maintained responsive web pages using HTML5 & CSS3; collaborated with team on UI improvements and cross-device compatibility fixes.

EDUCATION

- B.Tech – Electronics & Communication Engineering** 2022 – 2026
Priyadarshini College of Engineering Nagpur
- HSC:** Z.P. Highschool & Jr College, Sangadi – **80%** **SSC:** K.D. Ramteke Highschool, Bhandara – **83.6%**

CERTIFICATIONS

- NPTEL** – Python for Data Science **Coding Ninjas** – Java & DSA Fundamentals
