Professional Summary

Final-year B.Tech (ECE) student with hands-on experience in data analysis, Python development, and web technologies. Proven ability to work on real-world projects – from AI-based civic tech systems to end-to-end EDA pipelines – with internship exposure at two companies. Seeking a software development or data engineering role to apply and grow technical skills in a professional environment.

Technical Skills

Languages	Java, Python, SQL
Core Concepts	Data Structures & Algorithms, OOP, DBMS
Data Analysis	Pandas, Matplotlib, Seaborn, EDA
Web & Frameworks	HTML, CSS, JavaScript, Flask, REST APIs
AI/ML Tools	YOLOv8
Tools & Platforms	Git, GitHub, VS Code, Jupyter Notebook

Experience

Data Analyst Intern

Jan 2025 – Mar 2025

Clustor Computing, Nagpur

- Cleaned and analyzed 10,000+ records using Python (Pandas, Matplotlib), delivering reports that directly informed business decisions.
- Automated repetitive data preparation workflows using Python scripts, significantly reducing manual effort and improving reporting turnaround.
- Communicated analytical findings through visual dashboards and reports to non-technical stakeholders.

Web Development Intern

Mar 2024 – May 2024

CodeMate, Nagpur

- Built and maintained responsive web pages using HTML5 and CSS3, ensuring cross-device compatibility.
- Collaborated with the development team on UI improvements and feature updates for the company website.

Projects

Smart Pothole Detection & Mapping System

2025 – 2026

Python, YOLOv8, Flask, HTML, CSS, JavaScript

- Built an AI-powered pothole detection system using YOLOv8 on live road footage, targeting civic infrastructure improvement for Nagpur Municipal Corporation (NMC).
- Connected the detection pipeline (video input → model inference → bounding-box output) to a Flask web dashboard for real-time result visualization.
- Gained applied experience in object detection, confidence scoring, and deploying ML models in a web environment.

Customer Churn Analysis

Dec 2023

Python, Pandas, Matplotlib, Seaborn

- Performed end-to-end EDA on a 10,000+ record telecom dataset – handled missing values, engineered features, and identified key churn drivers.
- Produced visual reports (bar charts, heatmaps, distribution plots) translating raw data into actionable business insights.

Library Management System

Oct 2023

Java, OOP, ArrayList, File Handling

- Designed and built a fully functional Java OOP application managing books, members, borrowing records, and automated fine calculation.
- Implemented file-based persistent storage along with searching and sorting algorithms for efficient record retrieval.

Education

Priyadarshini College of Engineering, Nagpur

2022 – 2026

B.Tech – Electronics & Communication Engineering

HSC: Z.P. Highschool & Jr College, Sangadi – 80% | SSC: K.D. Ramteke Highschool, Bhandara – 83.6%

Certifications

- NPTEL – Python for Data Science
- HackerRank – Java (Basic)
- HackerRank – SQL (Intermediate)
